

COMPANY

Company Profile

BEUTTER is a supplier of precision mechanical components. The following points characterise our company.

■ **Founded in 1909 in Baden-Württemberg.**

The site is located in Rosenfeld, in the immediate vicinity of the A81 motorway south of Stuttgart.

■ **Around 160 employees.**

In production, more than 85 per cent of them are skilled workers.

■ **Single parts and assemblies with a high depth of manufacturing.**

We have all machining processes in-house. For special processes as well as surface and heat treatment, we work with capable suppliers.

■ **Small and medium series.**

Batch sizes of around 50 to 5,000 units are ideal for us.

■ **All machinable materials.**

We have particular experience with high-alloy steels, titanium and special materials.

■ **Our main industries.**

Medical Technology

Aerospace / Defence

Semiconductor Technology

Mechanical Engineering

■ **Data transfer and programming.**

Your data can be transferred using our CAD system SolidWorks. For programming we use SolidCAM and WIN CNC Flex IPS.
